Questions You Need to Know to Ace Your Joint Commission Survey

Meeting the expectations of a Joint Commission inspection is never easy. The survey is complex, thorough, and catches many organizations off guard. Triumvirate Environmental compiled the list of questions below to help you evaluate your facility’s practices and identify opportunities for improvement. Our mission is to help you stay safe and compliant.

Hazardous Materials EC.02.02.01

- Describe your manifest tracking, return-copy timeframes, and filing of documents.
- What would you do if a bag containing sharps, biowaste and chemical waste was identified in a location? How would you approach the collection, handling, storage, shipping, and the selection of the end disposal facility?
