TRIUMVIRATE ENVIRONMENTAL

ENVIRONMENTAL REMEDIATION, CONSTRUCTION, AND FACILITIES SERVICES

Environmental Remediation Management and Support

Environmental engineers, property developers, construction companies, government contractors, site managers, operations leaders, project managers, and stakeholders turn to us for safe, reliable remediation support, on a recurring or as-needed basis. Triumvirate Environmental, with expanded capabilities through Environmental Waste Minimization (EWMI), offers full-service expertise in:

- End-to-end field and remediation services, including demolition and decommissioning
- Real time, flexible, and compliant perimeter air monitoring for high-risk sites
- On-site project and HSO oversight
- Soil management, including classification, remediation, stabilization, transportation, and disposal
- Waste program management, transportation, and disposal with a focus on compliance, waste minimization, and cost efficiency
- Industrial services including tank cleaning, plant cleaning and decontamination, facility closure and dismantlement
- 24/7 emergency response from trained and certified teams, providing coverage for all types of emergencies

Turnkey Environmental Project Delivery

From day one, you get access to highly trained end-to-end field service and environmental remediation support services. Our teams provide upfront planning, onsite remediation activities, waste transportation, data collection, and onsite industrial services that support recurring and one-off projects. Every stage has health and safety oversight and rigorous project management built in along the way, from pre-construction assessments to field execution and beyond.

Reliably On-Time, On-Budget

Reliable, consistent support is the difference between a project that stays on track and one derailed by cost overruns and endless timelines. You need a partner you can rely on – one who shows up, delivers on schedule, and keeps critical projects on track. Backed by over 35 years of expertise across the U.S., our teams know how to get things done quickly, safely, and in full compliance with local, state, and federal regulations.

TRIUMVIRATE ENVIRONMENTAL

Operation-Ready from Day One

Our experts are ready to provide full-service, specialized, end-to-end project management; or tailored services to fit your project scope and meet your goals, without sacrificing attention to detail and expertise. Whether you're dealing with unusual or large-volume waste streams, navigating PFAS-related compliance concerns, or tackling complex remediation requirements, our team has the experience to help you move forward with confidence. On a larger scale, we also manage full lifecycle projects, from initial planning to final execution.

It's Safety First – Always

Safety is our #1 priority—it's in our mission statement—and we come with the metrics to prove it. Our OSHA logs, HSE plans, and corporate logs tell the story of an organization that achieves internal and client goals without sacrificing employee safety. We've built a culture that supports this, and that extends seamlessly to our clients in a way that enables full confidence from internal teams and stakeholders alike. When we're safer, your sites are safer as a result—and when that type of safety is integrated in your project, you're able to focus on the work that truly gets the job done.

Flexible Solutions Backed by a Powerful Network

Triumvirate's vast network of waste disposal facilities and processing options allow us to find the most efficient path for every waste stream for our customers. It also means that any program is fully scalable—with redundancies and options in place, waste never slows project timelines. Our experts can assess and assign disposal and oversight options as project requirements evolve, delivering creative solutions needed for success at unexpected or fluid site conditions. This approach unlocks efficiencies that will have long-lasting impacts.

Triumvirate Environmental is a true EHS services partner – our unique account governance model enables us to help customers maintain safe, compliant, and productive operations that are cost-efficient by integrating waste management, field services, onsite support, EHS consulting, sustainability, and technical expertise within one coordinated environmental program. Let us help you achieve the best EHS program outcomes with tailored support.
