TRIUMVIRATE ENVIRONMENTAL

Environmental Remediation, Construction, and Facilities Services

Triumvirate Environmental's acquisition of Environmental Waste Minimization (EWMI) is a strategic integration that allows us to offer field services, waste management, and EHS capabilities to our customers.

Remediation and Environmental Construction

- Underground and above ground environmental project work
  - Buried drum identification and removal
  - Tank removal and cleaning (UST, AST, catch basins, pits)
  - Cleaning and removal of piping systems
  - Groundwater treatment, product recovery, and water filtration including oil/water separators
  - Subsurface investigation projects and contamination assessment studies
- Capping projects
  - Landfill caps/upgrades/closures
  - Lagoon closures
  - Containment with low-permeability boundaries
- Site Restoration
  - CERCLA (Superfund) site remediation
  - In-situ chemical and biological remediation
  - Site assessments and evaluations
- Earthwork site preparation, assessment, and remediation
- Stream remediation and restoration
- Wetland construction and remediation
- Real-time perimeter air monitoring
- Construction project planning support and HSO oversight

Demolition and Decommissioning

- Facility and laboratory closure, dismantlement, decontamination, and decommissioning
- Site assessments
- Asset recovery and management
- Small to large scale demolition
- Concrete crushing
- Air handling systems and ductwork

Waste Management and Disposal

- End-to-end waste management and disposal for:
  - Hazardous wastes
  - Non-hazardous wastes
  - PCBs and PFAS
  - Fuels, flammables, and corrosives
  - Sludges
  - Wastewater
  - Investigation Derived Waste (IDW) including soil and groundwater
  - Oils
  - Food waste
- Project decontaminations for floors, ceilings, fume hoods, and rooms
- Dismantlement projects
- Dust decontamination
- Regular drum pad management

24/7 Emergency Response

- Cargo recovery
- Chemical spill cleanup
- Incident management
- Insurance claims
- Oil/fuel spill cleanup
- Post-fire cleanup
- Rapid response studies for uncontrolled spills of hazardous materials

Triumvirate Environmental and EWMI together provide full end-to-end management and oversight of remediation, construction, and field services projects. We are onsite doing the work for large-scale remediation events, post project clean-up and restoration, transporting waste, obtaining permits, and providing lasting impact through expert EHS services. No other organization can provide the same level of expert oversight, experienced support, and both project-based and long-term planning and program management.
