

EHS Compliance Programs for Cannabis Enterprises

Triumvirate Environmental helps early-stage and fast-growing cannabis companies understand the state and federal regulatory environment, obtain permits and licenses, and build environmental, health, and safety (EHS) programs. Our experts will help you stay in compliance, reduce your risk, and maintain continuity as you grow your product and your business. With our decades of experience, we partner with various life science companies – from small cannabis startups to large pharmaceutical organizations and everything in between – to support their EHS operations and enable their growth. Whether your cannabis organization is new to the EHS world or has some safety programs in place but needs guidance to reach operational excellence, we can assist you.

After a thorough assessment, we will work closely with your staff to develop and integrate EHS programs into your existing business systems to help reduce risk and assure compliance. A team of our specialists, assembled based on your custom needs, site-specific challenges, and compliance gaps, will collaborate with you to achieve your goals.

Benefits of Partnering with an EHS Expert

- ✓ **All-in-one service:** Rely on one partner to provide all the necessary EHS support for your cannabis company.
- ✓ **Efficient staffing:** Minimize the number of contractors required for a compliant EHS program.
- ✓ **Flexibility and scalability:** If you have a high growth period we can immediately adjust to handle new responsibilities.
- ✓ **Trust in our program:** We pay the fine if a program fails a regulatory audit.
