- Solvent waste collection
- 24-hour emergency response
- Spill response
- Facility decontamination
- Laboratory decommissioning
- Remediation services (chemical & biological)
- Biological safety cabinet disinfection
- Incubator and cold room disinfection

“What started out as a way to improve our hazardous waste management turned into a robust business relationship with Triumvirate Environmental, Inc. (TEI). Not only does TEI now handle our hazardous and laboratory waste removal, but their experts provided new policies, procedures, and essential trainings. Because of the hard work of many TEI employees, MCR Labs is infinitely better at managing and understanding our hazardous waste and laboratory safety, and we thank you for that.”

– Andrew Burke, Quality Assurance Manager, MCR Labs
