

LABORATORY RELOCATION SERVICES

Whether you're moving into a new lab space, renovating an existing building, consolidating labs, or decommissioning a facility, laboratory cleanout and relocation can be complicated and costly. The daunting process involves various components, from properly packing hazardous chemicals, to understanding your obligations under your old and new leases, to complying with a whirlwind of regulations.

Triumvirate Environmental will partner with you throughout your lab relocation project. Our highly trained project managers, environmental risk assessors, certified industrial hygienists, engineers, and decontamination specialists will guide you through the process, minimize risk, and provide site-specific solutions. We make it simple and efficient, enabling you to maintain business continuity while safely moving or decommissioning your lab.

Before Your Move
